

# INITIAL RECORDS VISIT TEMPLATE

- 1) Patients chief complaints (in patients own words): \_\_\_\_\_
- 2) Intraoral CA exam: \_\_\_\_\_
- 3) Medical Conditions: ASA: \_\_\_\_\_ Diagnosis: (All dental conditions listed): \_\_\_\_\_
- 4) TMJ range of movement and comfort (anterior edge to edge opening 40 mm average)
- 5) Evaluate gingival heights of contour: from 6-11: premolars:
- 6) Central incisor length (10 mm avg): upper actual: Proposed: lower actual:  
Proposed:
- 7) Anterior Angle Classification of Bite (Class 1, Class 2, Class 3):\_\_ Overjet: \_\_ Overbite: \_\_
- 8) Vertical occlusal dimension: reference teeth: CEJ to incisal edge measurements in habitual bite (18-20 mm avg):
- 9) Curve of Spee (flat, mild, moderate, stepped) (Buccal photo from canine to terminal molar)
- 10) Anterior curve of Wilson (22-27) (flat, hypoer-erupted, intruded, worn) (anterior open bite retracted anterior view):
- 11) Intraoral photos (14 views) (Document Midlines and cants)
- 12) Study models upper / lower alginates or digital impressions
- 13) Blue mousse bite relation in habitual bite
- 14) Wax bite in centric relation position- if there are multiple teeth missing, use wax rims on base plates fabricated from the study models
- 15) Tooth shade initial: proposed:
- 16) Teeth with mobility
- 17) Stable roots but compromised coronal portion of stable teeth (decay, fractured, wear)
- 18) Condition of teeth: maintain short term: , maintain long term: extract:
- 19) Referrals to specialists:
